Ho sempre pensato che le sfide più interessanti partano dal rispetto di vincoli.

Ho scelto di concentrarmi su un unico pensiero molto semplice e ricercarne la ricchezza e la complessità.

Con RIGA ho cercato di indagare il significato di questo termine su una superficie artigianale.

RIGA diventa quindi texture di una piastra da pavimento o rivestimento che attraverso un bassorilievo imperfetto esprime la sua matericità.

Riga è una barra incisa manualmente che si trasforma in sequenza infinita di segmenti irregolari.

RIGA è il segno che lo stucco lascia nelle incisioni della barra.

RIGA, infine, è un sistema di relazioni infinite tra moduli di materia e stucco.

*I have always thought that the most interesting challenges start from compliance with bonds.*

*I chose to focus on a single very simple concept and seek its richness and complexity.*

*With RIGA I tried to investigate the meaning of this word applied to a handcrafted surface.*

*RIGA becomes the texture for a floor or wall surface that expresses its meaning through an imperfect relief.*

*RIGA is a manually engraved board repeating an infinite sequence of uneven segments.*

*RIGA is the mark left on the board by the plaster.*

*RIGA is a system of unlimited relations between shapes and matter.*
